SOFTWARE STUDIO × AI TEAM

Custom software to run your business with fewer people.

We build the software and AI assistants that take manual work off your team: leads, contracts, invoices, payments and commissions.

PRODUCTS: ERP, AGENTS AND WEBSITES

01 — WHAT WE DO

You are paying salaries for work software can do.

	TODAY, BY HAND		WITH AXISWORKS
MOTORBIKE RENTAL · FULL CASE ON P. 7			
WORKSHOP	The mechanic hears what to fix by WhatsApp or word of mouth.	→	The return opens a work order with what to check and what to replace.
ORDERS	A part is missing and someone has to call or message the supplier.	→	The work order sends the parts order to the right supplier on its own.
AVAILABILITY	The bike is ready, but sits idle until someone remembers.	→	When the work order closes it goes back on the calendar and the WhatsApp bot offers it.
PERFORMANCE	A bike rents too little and nobody notices until the numbers come in.	→	The agents spot it, look for the cause and propose an offer for you to approve.
PROPERTY DEVELOPMENT · FULL CASE ON P. 8			
INVOICES	Works start and someone makes and sends the invoices one by one.	→	The site manager's report issues every invoice and sends them by WhatsApp and email.
PAYMENTS	Someone checks who has not paid and calls them one by one.	→	Automatic reminders until the payment arrives and is recorded.
BUYERS	Buyers call to ask about invoices and the works.	→	They see it in their portal: invoices, payments and progress on site.

THE GOAL **The same work,** with a smaller team.

17 AI departments build it.
Javier and Andrea sign off every delivery.

02 — WHAT WE SELL

An ERP, the agents that work on it and websites that bring in customers.

You run the business in the ERP. The agents work on its data and the websites bring customers to it. The same studio designs, builds and maintains all three.

MODULAR ERP

AxisWorks ERP

You switch on the modules your business uses today and add others when it needs them.

Properties · Bookings · Services

- Contracts, invoices and payments in one system
- One private database per client

9 AGENTS PER BUSINESS

Agents as a Service

A captain agent runs the day-to-day of your business inside the limits you set.

- Price, publishing, deleting, spending and sending to third parties are reserved for a person
- Operates on your ERP data

BUILT TO ORDER

Websites

Designed, built, published and tested by the same team.

- SEO and Meta Ads from the same studio
- A separate department tests it in production before we call it done

ALSO BUILT TO ORDER

CRM and sales pipelines · 24/7 WhatsApp assistant · Automations · Client portal · Integrations: Meta, WhatsApp, payment gateways · Meta Ads campaigns · SEO and visibility in AI answers · Social media content · Consulting: what to build first

03 — HOW WE WORK

How a request becomes working software.

01 **You tell us what is done by hand**

Which tasks take your team the most hours. We tell you which parts software can take over and what it would cost to build.

02 **The AI CEO hands out the work**

It splits the request into tasks and assigns them to the right AI departments.

03 **The departments build it**

They build, review and test. Quality proves it works and Security audits access and secrets.

04 **Javier and Andrea sign off the delivery**

Nothing ships without a person's approval. A separate department tests it in production.

AI CEO

TAKES EVERY REQUEST · 17 AI DEPARTMENTS

BUILD

The software

01 Frontend
02 Backend
03 Bots
04 Architecture
05 Deploy
06 Games
07 Game 3D
08 Pilots

GROW

Brand & demand

09 Design
10 Marketing
11 Communication

CONTROL

Rules, money & paperwork

12 Security
13 Quality
14 Legal
15 Admin
16 Docs
17 Organisation

Each department is an AI agent that works to written rules and reports to the AI CEO. Javier and Andrea direct the work and sign off on what ships.

04 — AXISWORKS ERP

Same modules, different inventory.

A modular ERP with contracts, invoices and payments in one system. Each company has its own database and switches on only the modules it uses.

PROPERTY DEVELOPERS

Projects and sites

Projects and plots, reservations with deadlines, contracts in three languages, payments by construction milestone and a portal where each buyer follows their own.

- Projects and plots
- Timed reservations
- 3-language contracts
- Buyer portal

BOOKING BUSINESSES

Bookings by date

Bookings of a product by dates, with rates, availability and payment, and a WhatsApp assistant that answers with your own data.

- Bookings by date
- Rates and availability
- Payment per booking
- WhatsApp assistant

SERVICE COMPANIES

Catalogue and invoicing

A catalogue of products and services invoiced by line, collections with proof of payment and customer support with its history.

- Catalogue
- Invoicing by line
- Proof of payment
- Customer support

30 modules

3 business types

1 database per company

3 contract languages

THE 30 MODULES, BY AREA

Sales	Documents	Finance	Communication	Database	Control panel

05 — AGENTS AS A SERVICE

The agent proposes, a person approves.

Each business gets its own pack of nine agents. A captain runs the day-to-day inside the limits the owner sets, and everything is written to its ERP.

Captain
CEO OF THE BUSINESS

Sets the plan and hands out the work. The only voice towards the owner.

Reception
CUSTOMER SERVICE

Answers customers and says from the first message that it is an AI.

Radar
MARKET & STRATEGY

Reads the market and proposes where to bet. Read-only.

Figures
ANALYTICS

Measures what each bet delivers.

Hook
ACQUISITION

Finds customers within the budget and channels allowed.

Quill
CREATIVE & CONVERSION

Writes the content and the pages that sell.

Listener
CUSTOMER ANALYSIS

Reads what customers say.

Route
OPERATIONS

Looks after day-to-day operations.

Treasurer
MONEY RULES

Plain code, not a model: enforces the monthly spending cap.

01 The owner writes the brief

Mission, spending cap and permissions. The agent can read it and can never write it.

02 The agent proposes

Every bet carries a hypothesis, a measure, a deadline and a cost. It proposes changes; it does not make them.

03 A person approves

Anything that touches a hard stop waits for a person. Everything is recorded in the ERP.

04 What works stays

A bet that works becomes code that runs by itself. One that does not is dropped.

HARD STOPS

Always for a person

- Price
- Publishing
- Deleting
- Spending
- Sending to third parties

06 — USE CASE · MOTORBIKE RENTAL

From the return to the next rental.

The whole fleet lives in the ERP. Every bike that comes back follows the same circuit and nobody copies data from one place to another: the only task for a person is the workshop job.

1 SYSTEM

CHECK-IN · ERP

The bike comes in

The return is logged and the bike moves to "in the workshop".

2 PERSON

WORKSHOP · WORK ORDER

A work order opens

The mechanic sees in it what to check and what to replace, and closes it when done.

3 SYSTEM

PURCHASING · SUPPLIERS

Parts are ordered

Whatever the work order needs goes out as an order to the right supplier.

4 SYSTEM

BOOKINGS · AVAILABILITY

Back to available

When the work order closes, the bike goes back on the calendar with its rates.

5 SYSTEM

BOT · WHATSAPP

The bot offers it

The assistant offers it to whoever asks, with real prices and dates, and closes the booking.

↻ WHEN THE BIKE COMES BACK FROM ITS NEXT RENTAL, THE CIRCUIT STARTS AGAIN

And if a bike is not renting enough...

AGENTS AS A SERVICE · WATCHING THE FLEET

FIGURES

Spots it

a bike that rents less than the rest of the fleet.

RADAR · LISTENER

Looks for the cause

in the metrics: occupancy, price against the market, season, what customers say.

CAPTAIN

Proposes an offer

with its hypothesis, its deadline and how it will be measured.

THE OWNER

Approves it

Price and publishing are hard stops: a person decides.

QUILL · HOOK · FIGURES

Launches and measures

If it works, it stays. If not, it is dropped and another is tried.

07 — USE CASE · PROPERTY DEVELOPMENT

One site report sets billing in motion.

In a development, buyers pay by construction milestone. The site manager logs the progress and the ERP does the rest: it invoices, notifies and reminds buyers to pay.

1 PERSON

SITE · SITE REPORT

The site manager marks the milestone

From the site, their report logs the start of works or whichever milestone is due.

2 SYSTEM

FINANCE · INVOICES

Invoices are issued

The ERP invoices each buyer what their contract sets for that milestone.

3 SYSTEM

WHATSAPP AND EMAIL

They go out on their own

Each buyer gets their invoice by WhatsApp and by email.

4 SYSTEM

BUYER PORTAL

Waiting in their portal

The notice takes them to their portal, where they see their invoices, their payments and how the works are going.

5 SYSTEM

PAYMENTS · REMINDERS

Reminds them to pay

If the payment does not arrive, automatic reminders go out until it is paid and recorded.

WHAT A PERSON DOES

One site report.

The site manager fills it in, on site. Everything else runs on its own.

SAMPLE NOTICE · WHATSAPP

Hello. The invoice for the “Start of works” milestone on your home is now in your portal, along with your payment schedule.

INVOICE.PDF · VIEW IN PORTAL ›

Reminder: payment for this milestone is due in 5 days.

Sample text. The same notice arrives by email.

WHAT THE SYSTEM DOES ON ITS OWN

- Each buyer’s invoices
- Sending them by WhatsApp and email
- Telling them it is in their portal
- The payment reminders
- Recording the payment

08 — THE STUDIO

A two-person studio with an AI team behind it.

PERSON · BUILD

Javier

Engineering & architecture

Designs the systems and signs off what ships.

SIGNS OFF · SYSTEMS AND DELIVERIES

AI · RUNS THE STUDIO

AI CEO

Dispatches every brief

Takes each brief, hands it to the seventeen departments and checks their work.

17 DEPARTMENTS REPORT TO IT

PERSON · DESIGN

Andrea

Design & content

Leads the brand, the content and the visual design, and approves the interfaces.

APPROVES · BRAND AND INTERFACES

17

AI departments in three areas: building the software, growing the brand, and controlling rules, money and paperwork.

2

people direct the work and sign off everything that leaves the studio.

PROGRAM MEMBER

Claude for Startups

Claude for Startups is Anthropic's program for startups that build with Claude. Our AI departments work with Claude.

09 — LET'S TALK

What takes your team the most hours?

Tell us what your team does by hand today. We will tell you which parts software can take over and what it would cost to build.
